The Six-Part Prompt Formula

ROLE + GOAL + CONTEXT + CONSTRAINTS + OUTPUT FORMAT + QUALITY CHECK

Good prompts explain what you need, what information matters, what limits apply and how the answer should be presented.

Part	Question to Answer	Example
Role	Who should the AI act like?	A careful shopping researcher
Goal	What result do you need?	Compare three laptops
Context	What should it know?	Budget, use case, country
Constraints	What must it avoid or respect?	No invented facts; under \$700
Format	How should the answer look?	Table plus recommendation
Check	How should uncertainty be handled?	Flag missing or changing information

Before using any prompt: remove passwords, card numbers, private health details, confidential work files and other sensitive personal information. Verify important facts, prices, laws and professional advice independently.
